SITUATION SUMMARY

Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Level 1	Level 1	Level 1	Level 1

Weather of Concern

Northern California

- High Wind Watch is in effect from Tuesday afternoon through Tuesday evening for southwest winds 35 to 45 mph with gusts to 60 mph possible for areas in Modoc County

Southern California

- Breakers of 10 to 12 feet can be expected for the Central Coast through Tuesday morning producing high surf that may generate minor beach erosion, as well as dangerous rip currents

Active Weather Warnings, Watches and Advisories by County:

Cal EOC Incident – 2014 Drought

SOC / Inland REOC remains activated in support of 2014 Drought

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Medford Weather:

Today there will be increasing mid and high cloud as a warm front approaches. This front may bring some light rain to the coast and Umpqua by day's end. Rain will be spottier elsewhere through tonight.

Eureka Weather:

Mainly dry weather is expected today as high pressure builds briefly over the region. Monday night and Tuesday a weather system will bring gusty winds and moderate rainfall. Wednesday looks mainly dry with periods of additional rain Thursday through the weekend.

Reno Weather:

Above average temperatures continue through much of this week. Breezy conditions return by late Tuesday as weak low pressure moves across the Pacific Northwest. Most areas will remain dry through Wednesday, with light showers possible mainly near the Sierra by Thursday. By next weekend, the potential increases for a change to a wetter and cooler weather pattern with gusty winds.

San Francisco Weather:

Dry and warm conditions are forecast through midweek except for a slight chance of rain in the North Bay on Tuesday. Rain chances will increase by Thursday and then greatly increase next weekend when the models indicate a potential change to a wet and stormy weather pattern which may last well into next week.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Mainly dry and mild weather for interior Northern California through mid-week as several weak weather systems brush through the area. A wetter weather pattern is forecast to return by the weekend.

Hanford Weather:

Dry weather will continue through midweek with temperatures warming to well above normal. A weak weather system will move to our North on Thursday bringing more seasonable temperatures through the end of the week. A stronger system is expected to arrive on Sunday.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

High pressure aloft and offshore flow will result in a warming trend through Tuesday with several record highs possible. A cooling trend is expected for the second half of the week as a weakening cold front approaches the area and brings a slight chance of rain North of Point Conception. A stronger system will bring a better chance of rain to the region next weekend.

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

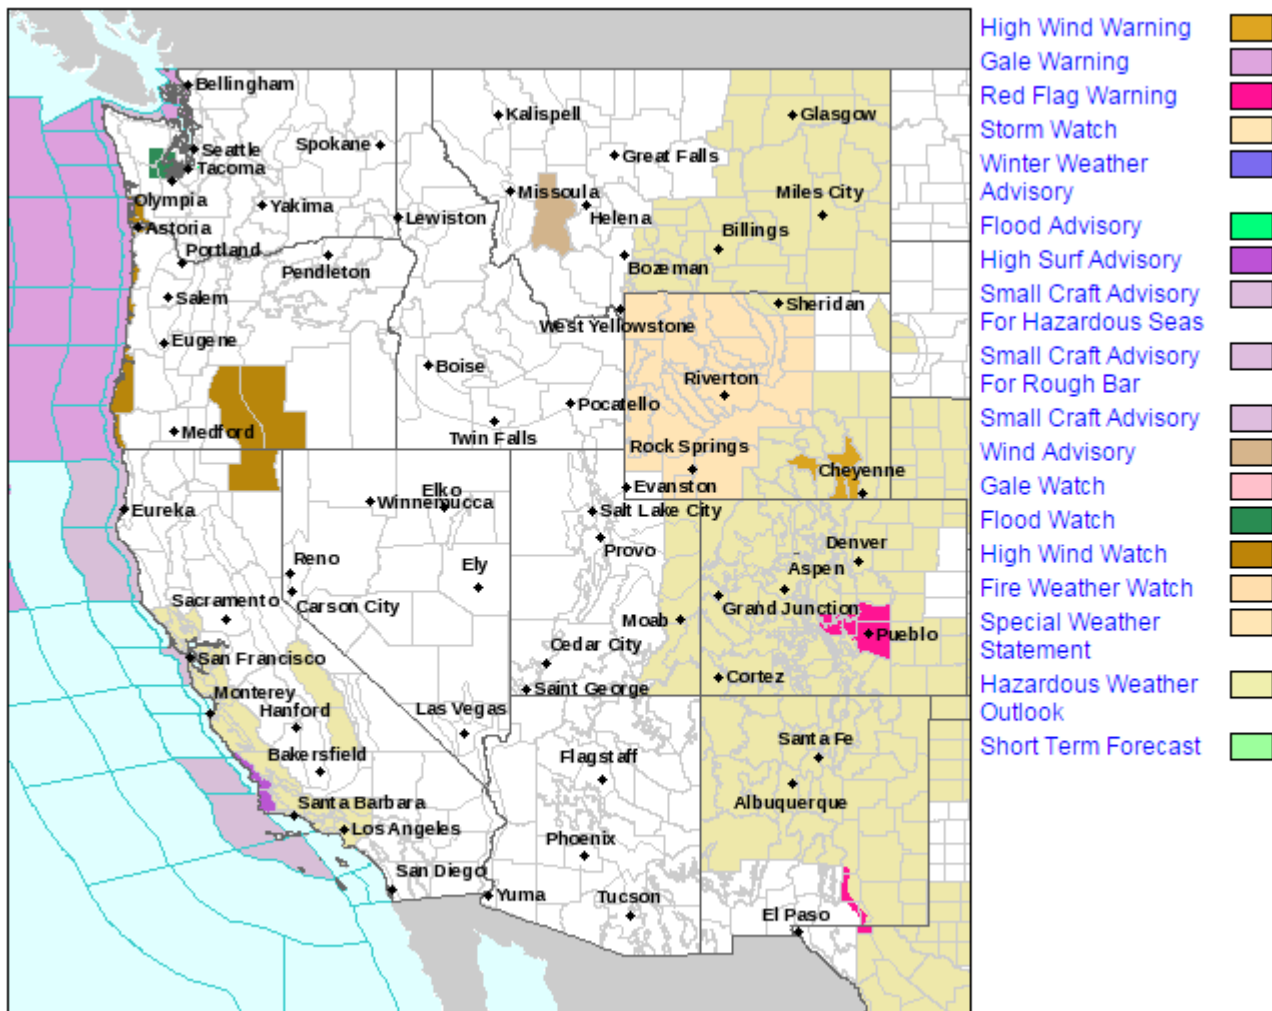

Onshore flow and the marine layer will keep coastal high temperatures near seasonal levels along with areas of night and morning low clouds and fog. High pressure will bring warming through Tuesday West of the mountains and into Wednesday farther inland. Weakening high pressure aloft and increasing onshore flow will bring a cooling trend for the latter half of the week with gusty west winds in the mountains and deserts for next weekend. A pacific trough of low pressure could bring precipitation as early as next Sunday.

Southeast California Weather:

A high pressure system will re-build over the region to produce more unseasonably warm afternoons with record or near record temperatures today through Wednesday. High clouds are also forecast to move through at times. More noticeable cooling is likely next Sunday and Monday as a cold front approaches.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on the first Wednesday of each month.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC and will be held once per month.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

Open Seats

(PER-304) Social Media for Natural Disaster Response and Recovery

This course focuses on the use of social media in disaster preparedness, response, and recovery. Social media has shown to help people communicate and collaborate about events as the events unfold. Social media can provide rapid and immediate real-time information about events that helps provide greater situational awareness leading to better decision making. Participants are provided with the knowledge and skills to integrate social media into their current communication plans. The course defines social media and its uses and identifies the tools, methods, and models to properly make use of social media in the context of disaster management and provides the information and hands-on experience necessary to help the participants' create social media disaster plans.
